EDUCATION

Carnegie Mellon University

Ph.D. in Information Systems, GPA: 4.06/4.0

Coursework: Machine Learning, Deep Learning, Econometrics, Causal Inference, Computational Social Science

Pittsburgh, PA

May 2029 (Expected)

University of Tennessee

M.S. in Business Analytics, GPA: 4.0/4.0

Full-tuition graduate assistantship (Awarded to top student, 2019 cohort)

Knoxville, TN

Dec 2020

Australian National University

B.S. in Finance & B.S. in Business Administration, GPA: 3.86/4.0

International Undergraduate Scholarship (Awarded to top international student, 2015 cohort)

Canberra, ACT, Australia

Jul 2019

INDUSTRY EXPERIENCE

Teemazing - trendingcustom.com

Lead Data Analyst

Hanoi, Vietnam (Remote)

Nov 2023 – Aug 2025

- Analyzed 2M+ transactions and launched checkout upsell recommendations, driving a 20% increase in add-on sales.
- Integrated 12 vendor cost/invoice sources into Redshift and built P&L dashboards for near-real-time profitability drill-downs by product and ad channel.

One Mount Group

Data Analyst

Hanoi, Vietnam

Jan 2021 – Sep 2022

- Led the CRM analytics workstream; optimized push and voucher targeting to sustain 1.5M+ monthly active users.
- Engineered voucher-recommendation features driving ~150K monthly redemptions.

RESEARCH EXPERIENCE

Ph.D. Research Projects

Carnegie Mellon University

Pittsburgh, PA

Aug 2024 – Present

AI Interventions for Online Learning

- Designed an experimental platform and ran A/B tests (n=120) to evaluate whether interventions triggered at rewind moments improve student performance.
- Built classification and survival models on student interaction data to predict whether and when a learner needs help, enabling well-timed interventions.
- Developed a proactive chatbot agent that adapts to students' interaction patterns to make learning sessions interactive; designed safeguards and fine-tuned the agent on course content to reduce hallucination and for stable experiment runs.

“Degamification” of Dating Apps

- Crawled mobile app release notes to identify major dating-app updates from 2019-2025, and wrangled 3TB of mobile-app logs (~1.28M U.S. users, 2019–2025) in BigQuery to map shocks as apps pushed users toward more intentional behavior.
- Applied event-study and difference-in-differences designs to Hinge's “Your Turn Limit” to estimate effects on user behavior, cross-app substitution, and heterogeneity across usage-based segments.

LayCare-LLM: health-literacy-aware medical reasoning (course project)

- Implemented the Reflexion verbal reinforcement-learning framework on Llama-3.1-8B to improve answer accuracy and calibration on medical question answering (PubMedQA, MedRedQA).
- Fine-tuned Llama-3.1-8B with 4-bit QLoRA adapters and evaluated the trade-off between readability and clinical accuracy in patient-facing medical explanations.

Research Assistant

VinUniversity

Hanoi, Vietnam

Oct 2022 – Jul 2024

- Researched fairness in recommender systems, developing methods to reduce popularity/exposure bias
- Publication: Nguyen H., Nguyen A., Nguyen T., **Hoang V.**, Le D., Wong K. (2024). Towards Efficient Communication and Secure Federated Recommendation via Low-Rank Training. The Web Conference (WWW) 2024.

SKILLS

Languages: Python, R, SQL

Technologies: Git, AWS, Google Cloud Platform, Tableau/Looker/Superset
